

# StorageX 8.0 Filesystem Restructuring

## Business Challenge

- Is filesystem sprawl placing a burden on your business plans?
- Have you recently completed an acquisition with another company and you need to consolidate disparate filesystems?

For many IT organizations, the word “provisioning” provokes images of mountains of manual steps which vary between vendors, hours of issue remediation and costly risk mitigation.

But provisioning your storage resources doesn't have to be so complex. What if you had visibility into your storage resource provisioning issues before they happen?

## How StorageX Works

StorageX's automated destination provisioning eliminates hundreds of manual steps and automatically creates the appropriate destination items such as volumes, file systems, folders, quotas, shares and exports on your destination file storage resources, making filesystem provisioning seamless and risk free.

- Use StorageX to provision heterogeneous file storage resources: CIFS shared folders, NFS Exports, Data ONTAP volumes, qtrees and SNAPMirrors. For S3 compliant storage systems, StorageX can provision S3 buckets.
- Using StorageX, you can re-structure and provision your file storage resources on a day-to-day basis or as part of your migration project.
- Infrastructure reports provide detailed hardware configuration details and filesystem information. Reports provide intelligent and dynamic views of your file storage infrastructure.

## Why StorageX

For over fifteen years, StorageX has been the industry leader for enterprise file management. New StorageX 8.0 raises the bar for file management with integrated analytics and SMB/NFS to S3 data movement.

We believe you should always have direct access to your files, we build around industry standards. You will have access to your Files, where you need it, when you need it, in the form you need it.

Unlock the power of your data and act to manage valuable storage assets.

## About Data Dynamics

[Data Dynamics](https://www.datadynamicsinc.com) is a leader in intelligent file management solutions that empower enterprises to seamlessly analyze, move, manage and modernize critical data across hybrid, cloud and object-based storage infrastructures for true business transformation. Its award-winning StorageX platform eliminates vendor lock-in and provides a policy-based, storage management platform to provide the insight, agility, and operational efficiency to transform your data assets into competitive advantage. Used today by 24 of the top Fortune 100 companies, StorageX has optimized more than 160 PB of storage, saving more than 80 years in project time and \$80 million in total storage costs.
