

Accelerate Adoption: Isilon to ONTAP Faster than Ever

Enhance Your Business

Partnering with Data Dynamics gives you the unique capability to increase the value of your client relationships

- NAS and Object Storage Sale acceleration and deployment risk reduction
- Increased Managed Services Profitability
- Unleash Your Customer's Data - provide high value, high margin, high impact service offerings to your clients

Data at the Speed of Business

Data Dynamics StorageX helps you get data where you need it when you need it. Whether it is to transform data or simply move/copy data, StorageX gets it done. StorageX is protocol based, which allows you to work with any heterogeneous and legacy system environments.

- NAS to NAS
- SAN to NAS (File Server on SAN to NAS)
- File Server to File Server
 - Windows (SMB)
 - Unix/Linux (NFS)
- File (SMB and NFS) to S3 and S3 back to File
 - Cloud
 - StorageGRID

About Data Dynamics

Data Dynamics is a leading provider of unstructured data management solutions that enable the agile discovery, analysis, optimization, migration and management of large data assets across the information lifecycle. Its award-winning StorageX product suite eliminates multi-vendor storage silos providing enterprises with an intelligent, policy-based, cloud storage management platform to empower data portability, usability and insight for business agility and operational efficiency. StorageX has been adopted by hundreds of enterprise customers, Fortune 500 companies, and large municipal governments to increase storage portability for the simplified adoption of next-generation heterogeneous datacenter and cloud infrastructures.

Isilon to Flex Group

Data Dynamics StorageX allows you to discover, transform, optimize, standardize, increase agility, and mitigate risks

Simple Steps

1. Enumerate Access Zones
2. Identify Source Paths
3. Select Flex Group Target
4. Replicate Data (NFS or SMB)
5. Tunable Incremental copies
6. Cutover

Other Uses

- Restructuring /Consolidation
- Storage Tiering
- Clone Shares/Exports
- SID Cleanup
- Inter AD Migrations

The Solution:

Data Dynamics provides a simple, seamless, and robust solution to plan and execute data mobility, for migrations and optimization initiatives. The solution should help shorten the overall timelines, optimize the utilization of internal or external resources and be cost effective. Data Dynamics Inc. provides for discovery and reporting of file system content and metadata.

StorageX from Data Dynamics Inc. is the solution of choice to help address this challenge and migrate data from older technologies and competitive devices to NetApp file based storage as well as StorageGRID. StorageX automates data discovery, policy based mobility and management for migration, consolidation, tiering and archiving of unstructured data in complex file storage environments.

The policy-based approach to unstructured storage management maximizes the value of data to business and minimizes risk, user downtime, cutover windows, and other disruptions related to file storage migrations, rebalancing, consolidations, tech refreshes, and SMB or NFS data restructuring. This automated approach significantly reduces the migration project time, lowers expenses, reduces risk and increases productivity.
